Waste glass is collected separately by colour: white, green and brown.

- Glass packaging for foods such as bottles and jars
- Pharmaceutical and cosmetic glass containers such as medicine phials, cream jars

- Energy-saving, LED and fluorescent bulbs
- Windows and car windows
- Glassware
- Glass vases
- Incandescent and halogen bulbs
- Ceramics, porcelain and earthenware
- Mirrors
- Drinking glasses

Sorting tips: Other glass colours belong in the green glass container. Please only put glasses emptied of residues into the waste glass collection, but you do not have to rinse them.
